

## Value Voice **Broad and Stable Wholesale Voice Termination**

### Broad Coverage High Route Stability

Value Voice offers global voice termination to carriers and service providers that require broad coverage and minimal fluctuations in quality metrics. If you're looking to optimize your cost while achieving high levels of route stability, iBasis Value Voice is the ideal product for your international business. Adding Value Voice to your international wholesale tables will enable you to reach more than 1,000 destinations with limited providers in routing, simplifying your daily operations.

iBasis Value Voice builds on the efficiency of iBasis Direct Voice by leveraging our best direct IP routes selected for their stability, cost, and voice quality, and supplementing them with select providers to broaden code coverage and enhance stability.

#### Key Features

- Market-driven prices for International fixed & mobile voice traffic terminated via direct interconnects to over 100 countries
- Routing over certified direct and refile providers minimizes ASR & ACD variations
- High code coverage and backfill capacity enhances route stability

#### Innovative Quality Monitoring and Routing Management Systems

- Based on supplier route classification, Value Voice routes calls among the best mix of selected suppliers to deliver higher levels of route stability
- Optimal routing lineups ensure lowest possible cost structure for the market segment
- Daily testing on thousands of routes enables us to maintain quality standards while optimizing cost structure
- Real time automatic route performance monitoring controls quality by removing underperforming vendors
- iBasis' proprietary Assured Quality Routing® (AQR) and PathEngine™ technology utilize real-time IP quality monitoring to select the best quality route for each call

## Interconnect Options

iBasis offers multiple ways to connect to Value Voice.

- Public Internet —via iBasis DirectVoIP, which enables interconnection with a wide variety of gateways, gatekeepers, session controllers and SIP proxies from the leading vendors
- Private IP circuits—via the iBasis Internet Central Offices (ICOs) worldwide
  - *Support for SIP RFC 3261 and H.323 V4*
- TDM circuits—via iBasis ICOs
  - *Support for SS7/C7 and ISDN*

## Customer Service

- iBasis' Network Operations Center offers 24/7 quality and network monitoring and customer support

## Pricing & Billing

- Market leading wholesale pricing with a minimum 5 day guarantee
- Invoices detailing total number of calls and minutes to each destination are issued based on contractual billing terms

## About iBasis

Founded in 1996, iBasis is a leading wholesale carrier of international long distance telephone calls and a provider of retail prepaid calling services and enhanced services for mobile operators. The company offers a comprehensive portfolio of voice termination services, value-added messaging, signaling and roaming services for mobile operators, as well as outsourcing services for many of the world's largest fixed and mobile operators and VoBB service providers. In December 2009, iBasis became a wholly-owned subsidiary of KPN. iBasis customers include KPN, KPN Mobile, E-Plus, BASE, TDC and many other large telecommunications carriers such as Verizon, Vodafone, China Mobile, China Unicom, IDT, Qwest, Skype, Telecom Italia, and Telefonica.
