

FraudAlert™ PLUS iconectiv®

Enhanced Security for your Business
and Customers

iBASIS is working with iconectiv® and incorporating their numbering data into a customer's call flow on the iBASIS network. Customers no longer have to create an internal project with capex and resources to integrate the iconectiv numbering data into the network. iBASIS' collaboration with iconectiv can have a customer up and running quickly and seamlessly.

WHAT DOES iconectiv OFFER TO ENHANCE FraudAlert?

Customers purchase iconectiv TruNumber Protect, which includes International Premium Rate Numbers (IPRN) and Global Rangeholder. iBASIS includes those databases into the network and specific customer's call flow, enabling each call to be dipped against the database and acted on. This creates a proactive approach to preventing a call from being connected, while FraudAlert™ provides prevention for calls that are still fraudulent but not part of the numbering data.

GLOBAL RANGEHOLDER

- Millions of allocated and unallocated number ranges
- Thousands of operators covered
- Hundreds of countries and territories covered
- Frequent monthly updates with over 20 thousand changes on average

IPRN DATA

- Thousands of IPRN ranges
- Hundreds of IPRN seller websites covered
- Frequent monthly updates

FraudAlert™ SECURITY SERVICE SNAPSHOT

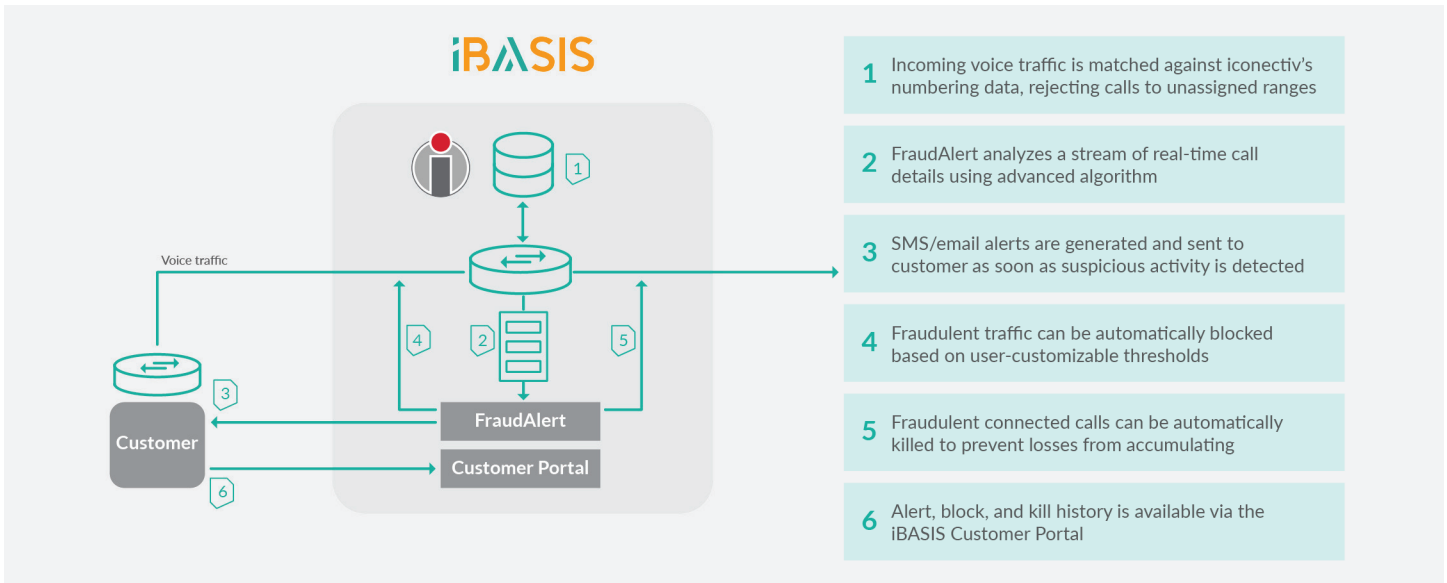

- Immediate alerts via SMS/email
- User-friendly interface to help gain detailed insight
- Customizable thresholds
- Analyze real-time streams of call details
- Automatic blocking of fraud attacks
- Automated disconnection of live fraudulent calls
- Non-invasive
- Another layer of defense to your existing fraud management
- No installation necessary
