

## AIRBOLT® + iBASIS

Delivering reliable connectivity globally for the world's smallest GPS, LTE-M, and NB-IoT tracker.

AirBolt® is the innovative creator of the world's first Bluetooth-enabled smart travel lock and next-generation GPS, LTE-M, and NB-IoT tracker. Designed to reduce those panic moments where you can't find your keys, or your laptop, or even your pet, AirBolt® GPS packs a lot of punch into the world's smallest GPS, LTE-M, and NB-IoT tracker. It's a lightweight, waterproof tracker with industry-leading battery life (up to one year of active tracking on a single charge). Simply clip it to your pet or throw it in a bag to track anything from expensive electronics to your two, or four-legged loved ones.

The company is on track to become the market leader in remote access management and asset tracking creating a world that is free of keys, swipe cards, cumbersome lock combinations, and lost valuables. It's a company that is known for quality products, including its previous success in the travel industry with AirBolt®: The Truly Smart Travel Lock, and the AirBolt® Card. To date, AirBolt® has run two successful crowdfunding campaigns, the most recent of which, for AirBolt® GPS, met its funding goal in seven hours. Its previous effort, for the AirBolt® Smart Lock, raised more than \$280,000 AUD and delighted backers with the quality of the product and its on-time delivery.

To ensure a seamless connectivity experience for AirBolt® GPS customers, AirBolt® sought a global partner to deliver reliable connectivity globally. They require a best-in-class cellular provider to match the quality of their products, delivering the necessary coverage and critical infrastructure.

AirBolt® selected iBASIS to provide its GPS, LTE-M, and NB-IoT solution, serving as the backbone to the AirBolt® GPS devices. To go beyond standard Bluetooth tracking, AirBolt® GPS needed a rock-solid solution to the complexities of global connectivity. And it found just what it was looking for in iBASIS.

## RESULTS

- AirBolt® can now provide coverage across multiple countries using one point of contact rather than many different cellular providers
- Strong market differentiated benefits including competitive pricing, ability to scale, API first methodology, and seamless switching between networks,
- Enhanced customer service management through the iBASIS web management portal enabling AirBolt® to manage their eSIMs and monitor data usage for effective future scaling and eSIM management tied back to its backend systems.

## ABOUT iBASIS

iBASIS is the leading communications solutions provider enabling operators and digital players worldwide to perform and transform. Powered by Tofane Global, iBASIS is the first independent communications specialist, ranking third largest global wholesale voice operator and Top 3 LTE IPX vendor with 700+ LTE destinations. iBASIS today serves 1,000+ customers across 18 offices worldwide.

iBASIS provides the end-to-end Global Access for Things™ connectivity solution, delivering single source cellular IoT access (LTE, LTE-M and NB-IoT) worldwide provisioned through GSMA-standard eSIM/eUICC technology. The solution simplifies IoT device connection through one unified platform for seamless, remote, programmable, and secure communication. For more information, please visit [iBASIS.com](http://iBASIS.com).

“  
iBASIS has been the go-to partner to make the AirBolt® GPS one of the best tracking solutions globally. We needed a one-stop shop for our cellular requirements, and had to look no further than iBASIS. ”
