

RESCUESTAT + iBASIS

Over 50,000 Automated External Defibrillator (AED) units globally will be monitored and managed remotely

RescueStat, a leading provider of Automated External Defibrillator (AED) Management products and services, wanted to leverage their patented technology to monitor the readiness status of AEDs around the world. The iBASIS eSIM enables RescueStat's Remote Monitoring System (RMS) to access more than 700 networks worldwide, transmitting critical data from the AED to the end user. If the AED ever fails its self-test, the iBASIS eSIM alerts the user and RescueStat so that an experienced support team can troubleshoot the problem and get the AED back to working condition, ready to save a life!

RESULTS

- Dramatic increase in effectiveness of Public Access Defibrillation (PAD) programs combining RescueStat Automated External Defibrillators (AEDs), Remote Monitoring System (RMS), and iBASIS eSIM
- Over 50,000 RescueStat AED units will be globally remotely monitored via the iBASIS eSIM
- One of the fastest implementations of our IoT solution to date, completed in just five days

“

The iBASIS eSIM is the perfect solution to further enhance the effectiveness of critical public access defibrillation programs by enabling remote monitoring of AEDs.

This solution ensures that devices will be fully available in critical circumstances and we are very proud to partner with a company that shares our commitment to delivering life-changing innovation and performance.

”

Carl Dixon
CEO, RescueStat

ABOUT iBASIS

iBASIS is the leading communications solutions provider enabling operators and digital players worldwide to perform and transform. Powered by Tofane Global, the new iBASIS is the first independent communications specialist, ranking third largest global wholesale voice operator and Top 3 LTE IPX vendor with 660+ LTE destinations. With the integration of Tofane's acquisition of the Altice Europe N.V. international voice carrier business in France, Portugal, and the Dominican Republic, iBASIS today serves 1,000+ customers across 18 offices worldwide.

iBASIS provides the end-to-end Global Access for Things™ connectivity solution, delivering single source cellular IoT access (LTE, LTE-M, and NB-IoT) worldwide provisioned through GSMA-standard eSIM/eUICC technology. The solution simplifies IoT device connection through one unified platform for seamless, remote, programmable, and secure communication. For more information, please visit www.iBASIS.com.
