

8th Edition

VoLTE & 5G ROAMING ROUNDTABLE

April 12, 2022 | Virtual Session

BE THERE FIRST

ROUNDTABLE OBJECTIVES

Stimulate interaction and **information sharing** with Mobile operators on VoLTE Roaming and 5G Roaming, despite limitations of its virtual nature

A pragmatic and **constructive** discussion, allowing early adopters to find each other and share their experiences and the ecosystem they benefit

ON THE AGENDA

15:00 – 15:05	Welcome & Introduction Session Objective & Agenda	Patrick George, EVP Product & Business Development, iBASIS
15:05 – 15:15	VoLTE & 5G Roaming Outlook	Nitin Bhas, Strategy & Insight Lead, Kaleido Intelligence
15:15 – 15:25	Operator's perspective: KPN	Leendert Koning, Commercial Product Manager Roaming, KPN
15:25 – 15:35	Operator's perspective: Bouygues Telecom	Benoit Bertin, Head of International Wholesale, Bouygues Telecom
15:35 – 15:45	Operator's perspective: Telus	Tavis Freeman, Manager of Vendor Relations, Telus
15:45 – 15:55	IPX provider's perspective: iBASIS	Maïssa Jamli, Sr Product Manager, 5G Roaming & Innovation, iBASIS
15:55 – 16:00	Conclusions & Wrap-up	Edwin van Ierland, CEO Voice & Mobile Data, iBASIS

Kaleido Intelligence

5G Roaming: MNO Opportunities & Requirements

iBASIS VoLTE & 5G Roundtable 2022

Presentation by Kaleido Intelligence

MNO 5G Roaming NSA & SA Launch Plans

5G Roaming Deployment Plans: When will you launch 5G roaming? (Based on NSA/SA architecture)

With several operators currently testing and trialling 5G SA roaming interoperability, around 34% of the respondents expect to launch 5G SA roaming in 2022.

Source: Kaleido Intelligence

The 5G Roaming Opportunity for MNOs

Roaming Revenues in 2026: Kaleido Forecasts \$18 billion in Inbound & Outbound Revenues

Source: Kaleido Intelligence

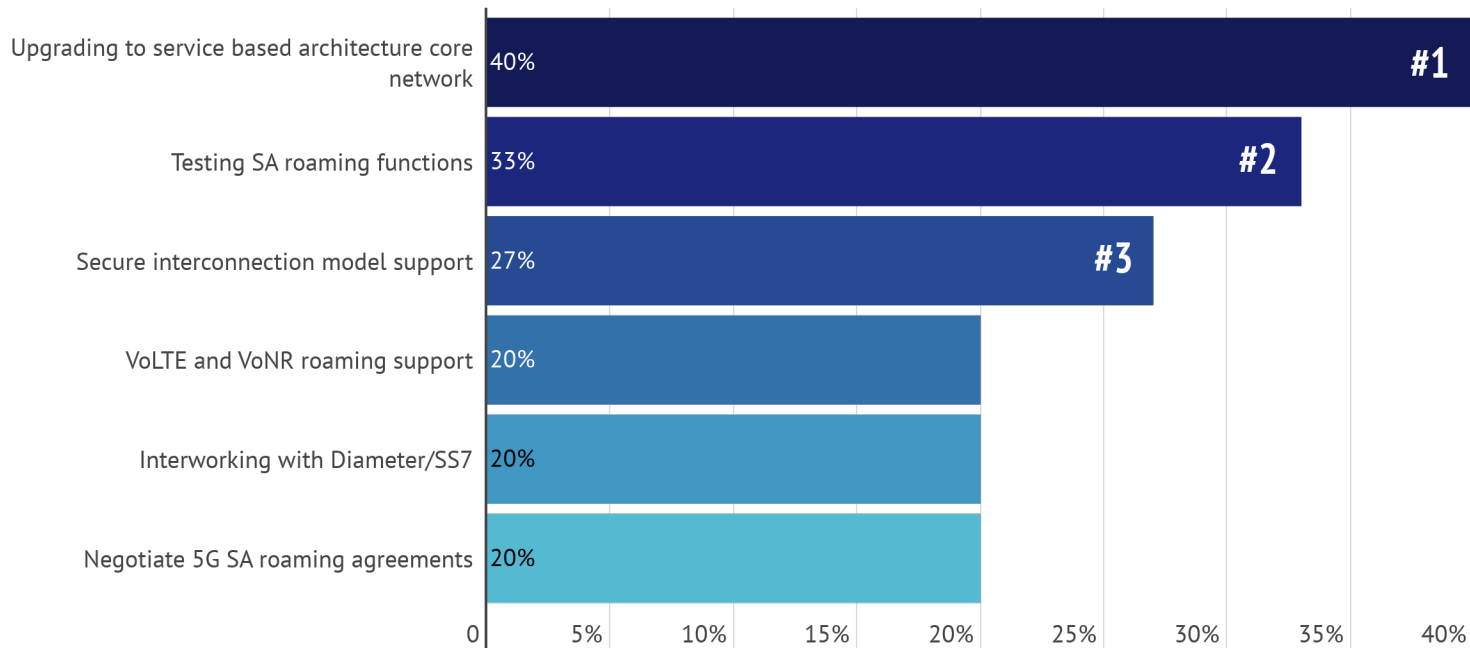

5G Roaming Use Cases: #1 VR/AR Applications Gains on Industrial & Automotive Use Cases

Source: Kaleido Intelligence

5G SA Roaming: MNO Requirements

What do you perceive to be the most immediate requirements while launching 5G SA roaming?

Source: Kaleido Intelligence

IPX Vendor Requirements & Innovation

IPX Vendor Requirements for 5G SA Deployment

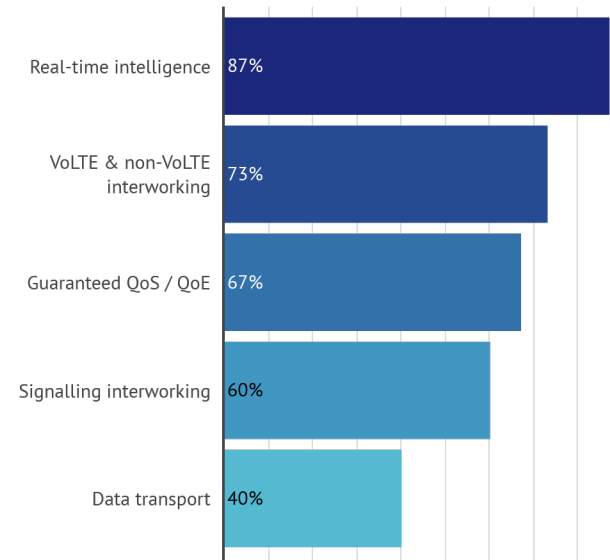

What are your top expectations from your IPX vendor while launching 5G SA roaming?

Source: Kaleido Intelligence

5G Service Innovation MNO Expectations: Top 5

What kind of services or innovation you expect from your IPX provider?

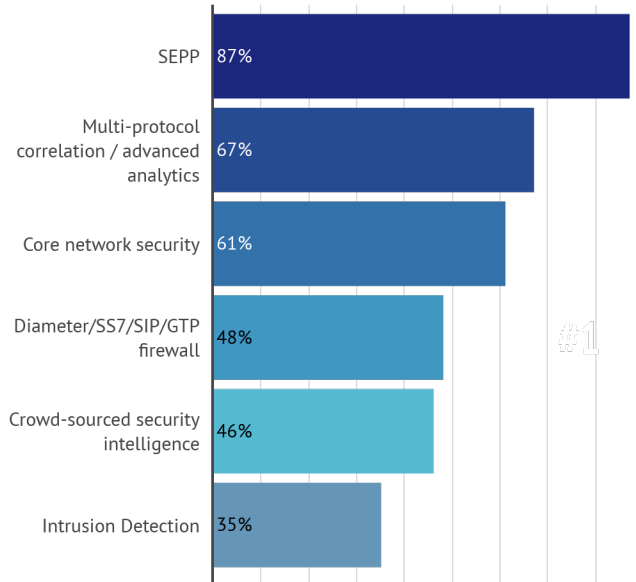

Source: Kaleido Intelligence

Addressing A New Security Architecture & The IPX Role

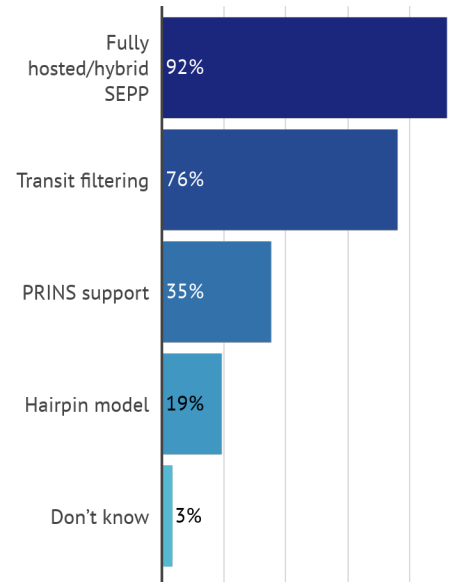

Security & 5G: Why 'Best-in-Class Security' is a 'Must Have'

What are your priorities for security investment plans in 2022?

Source: Kaleido Intelligence

Which security method(s) do you expect your IPX in 5G to use to provide you VAS services for 5G; how do you expect your IPX provider to address these?

Source: Kaleido Intelligence

87% of survey respondents view SEPP investment as the core priority for 2022, given that 5G roaming initiatives are accelerating.

The Essential Actions For 5G Roaming Success

QoS & QoE Expectation Intensifies

What are your QoS/QoE expectations from your IPX provider, compared with today?

Source: Kaleido Intelligence

GTP-U & GTP-C reporting and charging capabilities found to be the #1 QoS/QoE expectation by 67% of the MNO respondents.

”

Partnering with a reliable and innovative IPX provider to deliver an optimal 5G roaming experience, with a clear focus on capacity, security, QoS and analytics is fundamental.

About the White Paper

This latest edition of the 5G Roaming white paper from iBASIS and Kaleido Intelligence highlights the opportunities that 5G will bring for operators, alongside the associated MNO requirements and expectations from IPX vendors. Kaleido Intelligence surveyed nearly 100 respondents across tier-1 operators around the world on their 5G roaming plans during January-February 2022 to learn more about their commercial and technical requirements for implementing 5G roaming from an IPX, security and signalling perspective.

VoLTE Roaming

An operator's perspective

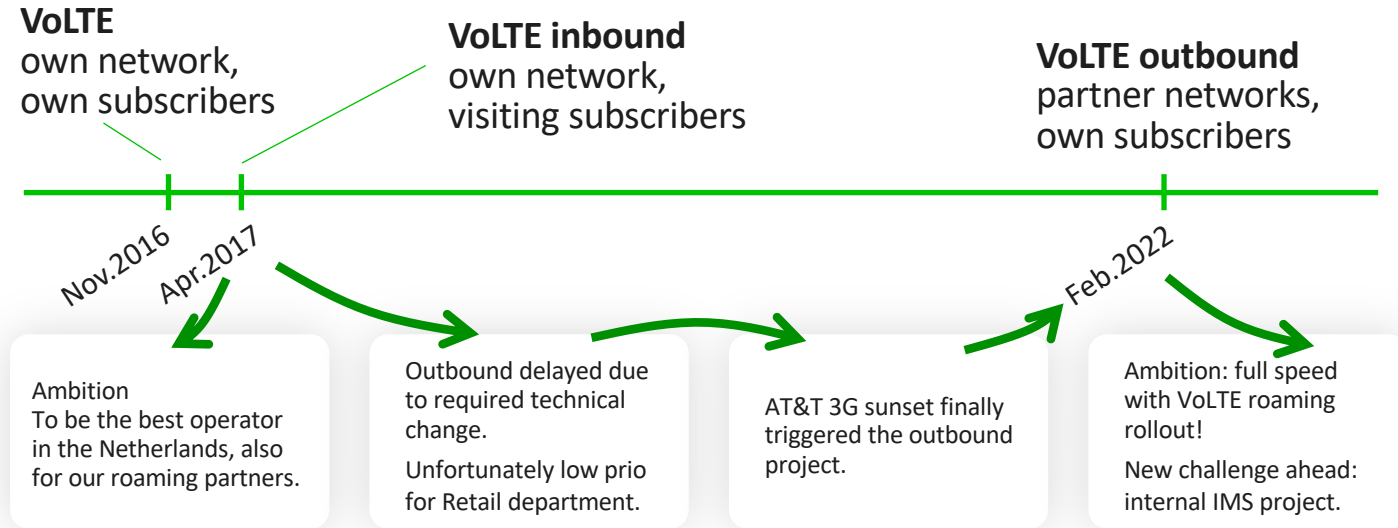

Leendert Koning

12 April 2022

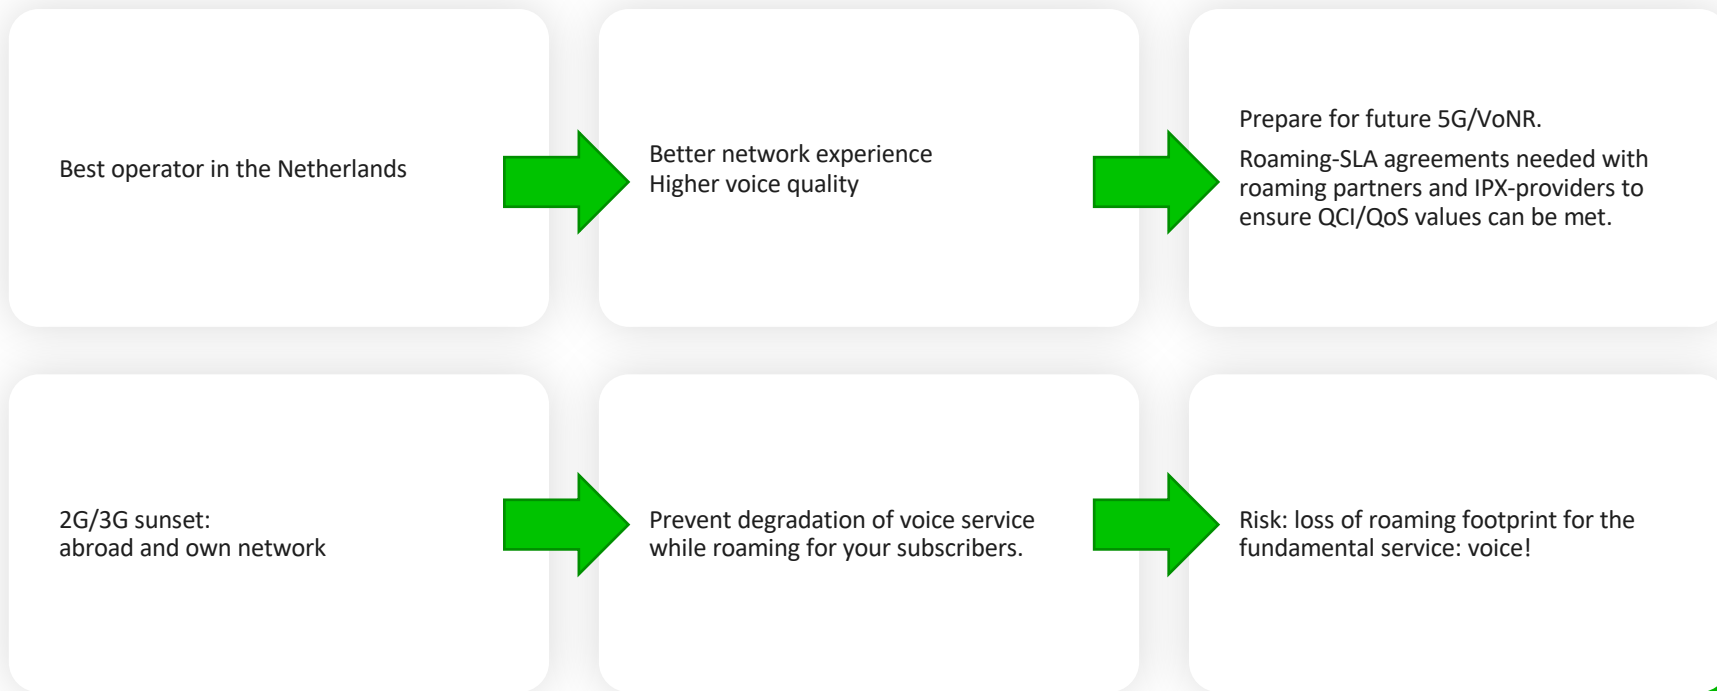

kpn. The network of the Netherlands

KPN's VoLTE timeline

Business drivers

12/04/2022

VoLTE & 5G Roaming

Bouygues Telecom

VoLTE Roaming

US EXPERIENCE

VoLTE launched in 2021 but still to learn about QoE

Device management complexity

Short and premium numbers not supported yet

LAWFUL INTERCEPT

Mandatory for inbound opening with complex requirements from French Authorities.

Complete new solutions from vendors – work in progress

TESTING CHALLENGE

Available ressources not aligned with upcoming launches

New approach for IREG testing to be defined

Looking for new testing solutions

5G Roaming

NSA

Opened with 15 operators (outbound) – 26 (Inbound)
Default launch on demand

Higher data speed ... when 5G spectrum available

VoLTE as prerequisite for some operators

SA

In design phase for roaming architecture – open questions :

- Architecture per use cases: HR vs LBO.
- Signalling and user plan interconnection options.
- Management of slice ID between VPMN and HPMN.
- Voice handling

Billing system upgrade (BCE)

4G core virtualization – side effects on VoLTE roaming rollout

5G Roaming Update

TELUS Partner Solutions

April 2022

Roaming | Service evolution

	Non-Standalone (NSA) NOW		Standalone (SA) 2023-24
Next Evolution of Roaming	Customer Experience	Partner Relationship	In Development
Quick to stand up	Consistent Faster Speeds	Data Growth	Multi-year roll-out
Broad industry uptake	Improved coverage	Quality Differentiator	No Live Roaming

5G NSA and SA will evolve the customer experience

5G Roaming | Standalone considerations

Internal Deliverables

- Implement network nodes (SEPPs)
- Billing system upgrade (BCE)
- Voice fallback development
- Interconnect / IPX peering strategy
- Steering solution development
- Device support enablement

External Drivers

- Industry standards
- Partner readiness
- Vendor enablement
- Wholesale agreement terms

ENABLING THE JOURNEY TO 5G ROAMING

Consumers

- Embraced a **digital lifestyle**
- Emphasized **data usage**

Industry

Significant boost in the **cellular M2M** market

- Accelerated **digitalization strategies** in all industry verticals
- Increased opportunities for **M2M initiatives** during pandemic

INTERNATIONAL MOBILE MARKET GROWTH WILL BE DRIVEN BY

Post-pandemic traffic
recovery

Consumers high demand on
data

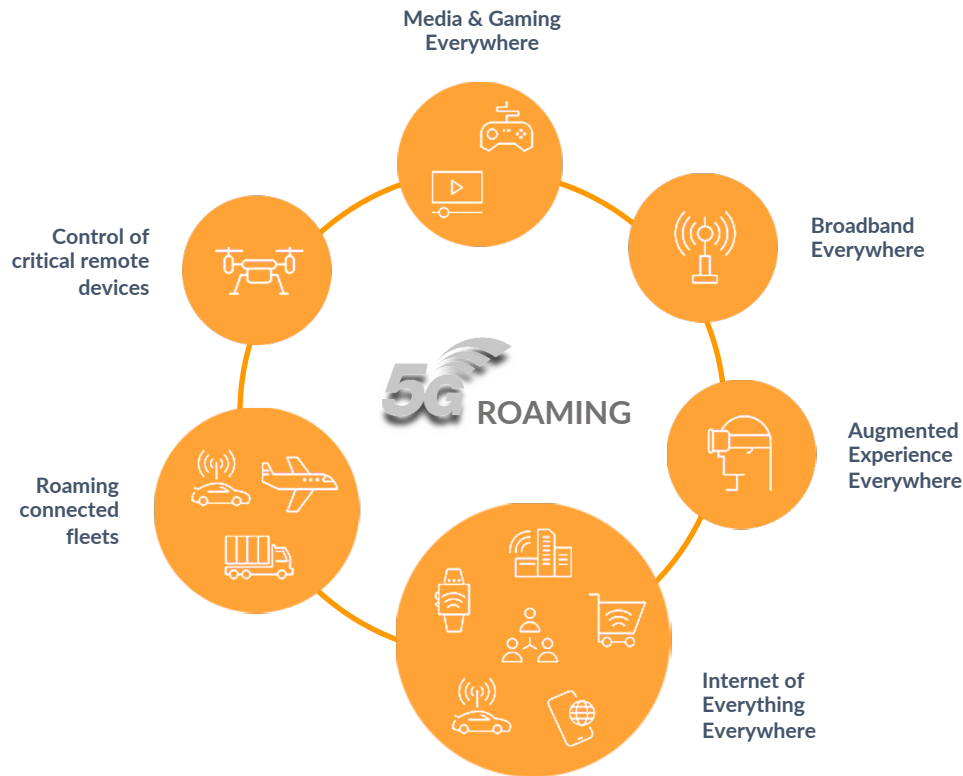

Cellular IoT driving new
business cases and charging
model

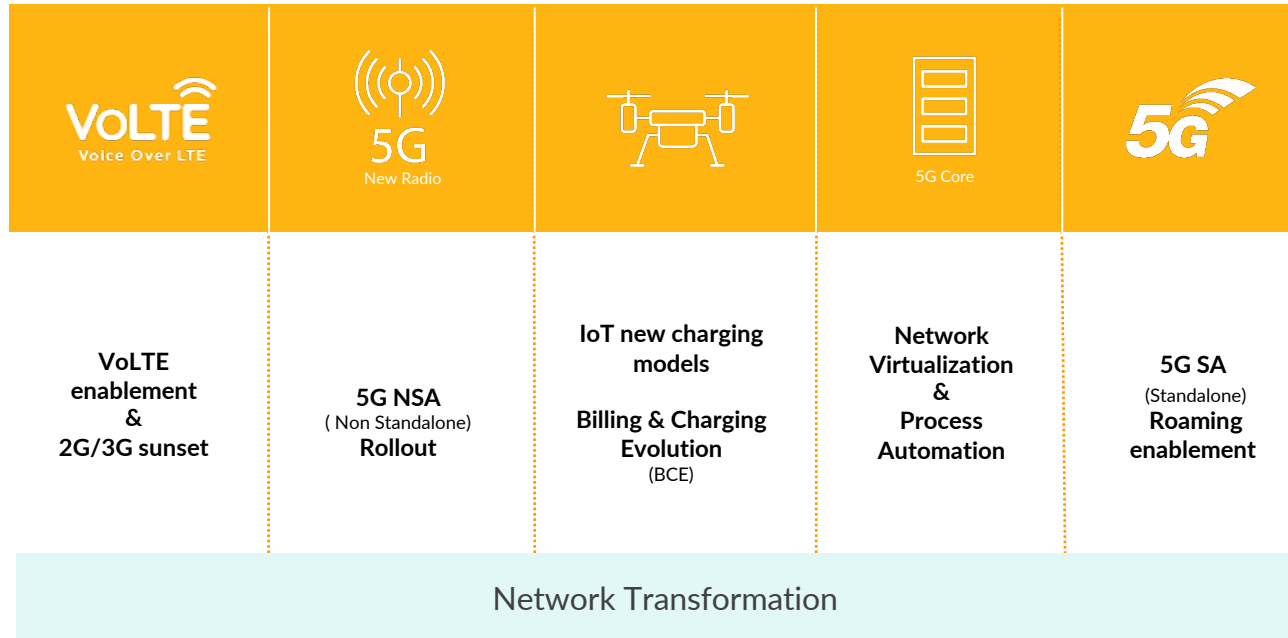

Industry's demand on
global connectivity

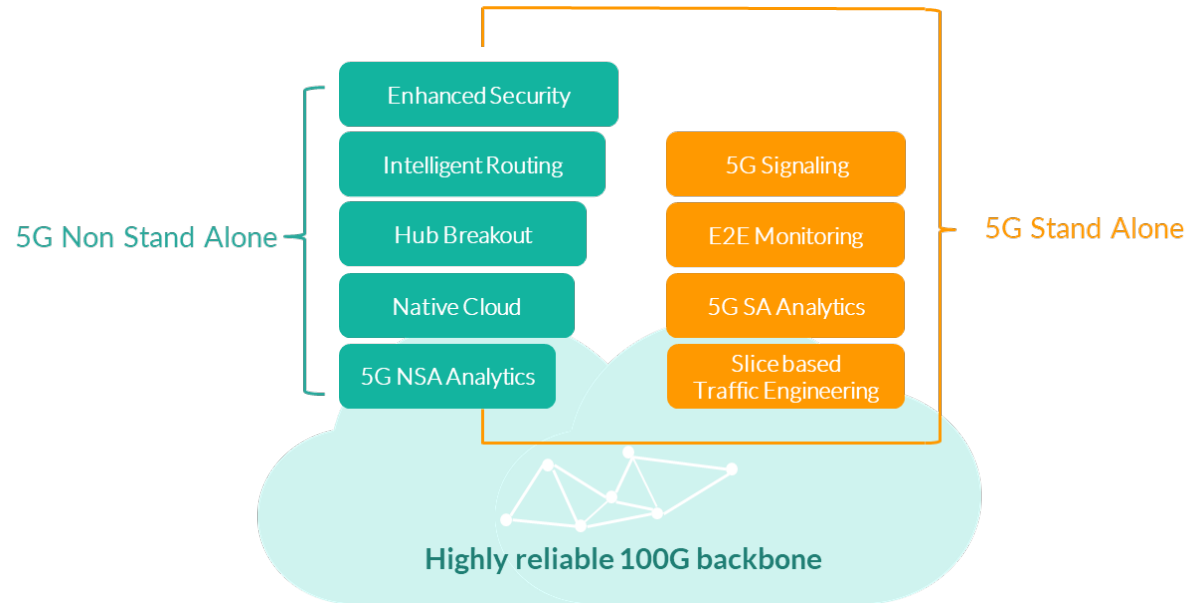

5G has the potential to unlock new revenue streams in roaming

- Take Data usage and Digital Relationship to the next level
- Enable & monetize differentiated services
- Massive roll-outs of connected objects become possible
- Unleash the full potential of network for industrial MVNOs and IoT players

- Encrypted Signaling
- Technology interworking
- Capacity management
- End-to-end quality of service all the way to the visited network
- Local & regional break-out
- Slicing business requirements
- Value added services
- Security

ENABLING 5G ROAMING

- 5G SA PRODUCTION ENVIRONMENT DESIGN
 - SEPP
 - SCP
 - IWF
 - IPUPS
- PKI INFRASTRUCTURE
- 5G SECURITY
 - http/2 firewall
 - GTP firewall
 - 5G attack detection & prevention
- 5G ANALYTICS & MONITORING
 - InVision NSA Module
 - InVision SA Module
- 5G ROAMING VAS
 - BCE for Clearing
 - SoR, WSMS etc.
 - Policy control

SINGLE GATEWAY
to 3G/LTE/5G Roaming

STRONG FOOTPRINT
via direct peers

COLLABORATION
with customers

BIG DATA ANALYTICS
with iBASIS InVision platform

Network Slicing Support | QoS and QoE Support | 100G Level Interfaces | Backward (3G/LTE) Compatible | 2B+ LTE Enabled Subscribers | 2,000 Fixed and Mobile Destinations | 700+ LTE Destinations

BUILDING EXPERTISE ON 5G SA USE CASES

- Signaling interconnection testing
- Hosted SEPP
- 3G-4G-5G Interworking
- 5G Peering testing
- Slicing
