

iBASIS FIXED WIRELESS ACCESS (FWA)

The Future of Connectivity

In an era where digital transformation is paramount, iBASIS introduces its groundbreaking Fixed Wireless Access (FWA) solution with the industry's first backup to other Tier 1 providers.

Leveraging the power of FWA and eSIM technology, we deliver unparalleled high-speed data connectivity, catering to various applications from enterprise broadband to IoT deployments.

FWA WITH POOLED BACKUP

- **Primary Network:** FWA on USA Tier-1 (A), with fallback to USA Tier-1 (B) and (C). For example, FWA on Verizon with fallback to AT&T/T-Mobile included*
- **Single iBASIS eSIM:** Eliminates the need for multiple SIM cards or multi-slot routers, simplifying connectivity management
- **Data Pooling:** Each line contributes to a monthly fallback pool, shared across all lines for consistent connectivity

TRANSPARENT PLAN AND PRICING:

- **Simple Pricing:** A single monthly fee for an FWA plan with pooled backup
- **Data Pooling:** Pooled backup data is provided on the remaining Tier 1 US operators. For example, 20 lines share 200GB of fallback data/month
- **Usage Flexibility:** Additional fallback data is available on an overage basis if the pool is exhausted

* Carrier Device Certifications Needed

FWA SERVICE USE CASES:

- Primary and backup connectivity for critical business applications
- Commercial broadband as a fiber/cable alternative
- Retail, kiosks, logistics, warehouses, construction sites, and industrial applications
- Remote offices, home offices, digital signage, and EV charging stations
- Security and surveillance needs in various environments

MARKET INSIGHT AND TRENDS:

- The FWA market is poised for explosive growth, projected to reach USD 151 billion by 2028, growing at a CAGR of 38.17%**
- Enterprises are increasingly taking advantage of FWA's speed and convenient installation for primary line and backup use cases
- In North America, FWA is increasingly adopted to bridge the high-speed internet gap in remote and rural communities

iBASIS'S AWARD-WINNING eSIM:

- iBASIS's award-winning eSIM is at the core of our FWA solution
- Our patented solution enables intelligent profile switching to provide the right connectivity at the right time, including for reliability and compliance with local regulations and roaming policies
- We offer real-time profile downloading from major operators like Verizon, a feature unique to iBASIS
- Our multi-profile eSIM technology provides flexibility, security, and a seamless global deployment experience

iBASIS's Fixed Wireless Access...

More than just a connectivity solution. A pathway to digital transformation and global reach.

Contact us today to explore how our FWA solution can revolutionize your business in the digital era.

ABOUT iBASIS

iBASIS is the leading communications solutions provider enabling operators and digital players worldwide to perform and transform. Powered by Tofane Global, iBASIS is the first independent communications specialist and Tier One IPX vendor with 800+ LTE destinations. iBASIS today serves 1,000+ customers across 28 locations worldwide. iBASIS optimizes global connectivity, quality and security, so customers achieve high return on voice, SMS A2P messaging, mobile data, 5G roaming and IoT.
